

MPH – Professional Option

Academic Year 2014-2015

Program Profile

The Master of Public Health (MPH)-Professional Option is an interdisciplinary degree that provides education and training for professionals in any field who want to strengthen their general knowledge and skills in public health. Ultimately, graduates of this program will contribute to the expansion and enhancement of a competent public health workforce that is advancing the well-being of Texas' citizens and beyond. Students in the Professional Option will specifically strengthen their knowledge and skills in public health through the following areas:

1. Health Policy and Management
 - a. The MPH student will discuss the policy process for improving the health status of populations.
 - b. The MPH student will apply the principles of program planning, development, budgeting, management and evaluation in organizational and community initiatives.
 - c. The MPH student will apply quality and performance improvement concepts to address organizational performance issues.
2. Professionalism
 - a. The MPH student will apply basic principles of ethical analysis (e.g., the Public Health Code of Ethics, human rights framework, other moral theories) to issues of public health practice and policy.
 - b. The MPH student will distinguish between population and individual ethical considerations in relation to the benefits, costs, and burdens of public health programs.
3. Leadership
 - a. The MPH student will describe the attributes of leadership in public health.
 - b. The MPH student will describe the alternative strategies for collaboration and partnership among organizations, focused on public health goals.

MPH Core Competencies

The Master of Public Health degree program prepares students to address the following core competencies while advancing their knowledge of public health:

Competency	Competency Description
Public Health Knowledge & Skills	The MPH student will apply basic knowledge and skills of the core public health sciences that include: biostatistics, epidemiology, health management and policy, behavioral and community health, and environmental and occupational health, to the prevention of illness and injury and the promotion of population health.
Integration of Theory and Practice	The MPH student will demonstrate the effective integration of theory and practice related to public health issues that affect diverse populations, through a thesis or comprehensive examination and a practice experience.
Communication and Informatics	The MPH student will gather, organize, and manage data and information effectively to address public health issues through oral and written communications to diverse professionals and lay audiences.
Diversity and Culture	The MPH student will demonstrate the ability to interact with both diverse individuals and communities to produce or impact an intended public health outcome.
Professionalism	The MPH student will apply ethical principles to the practice of public health in a variety of settings, demonstrating personal integrity while embracing diverse communities.
