

Help save lives. **CARRY NALOXONE.**

What to do

- Check for responsiveness
- Call 911
- Roll onto back
- Gently check for responsiveness
- Open Narcan package
- Insert fully into one nostril
- Depress plunger

What is Narcan?

Narcan (naloxone) nasal spray is an over-the-counter medication used to treat an opioid overdose emergency. Narcan works by rapidly reversing the opioid's effects. Narcan should be given as soon as possible when an opioid overdose is suspected. Patients also should receive emergency medical care immediately, even if they wake up.
